

Welcome to the *Natural Inquirer* Climate Change Education Collection!

As a global citizen, you know that people around the world share similar environmental concerns. The changing climate is one concern shared by people everywhere. Some Forest Service scientists are interested in studying climate change and its relationship to forests, grasslands, air, and water. You will learn about one of these studies in this monograph.

As you know, scientific research is a continual process of discovery. Forest Service scientists are learning much about climate change, but there is still much we do not know.

This monograph is part of a collection of articles describing climate change research. You can order any of the *Natural Inquirer* monographs or journals by visiting <http://www.naturalinquirer.org>. The monographs and journals are free of charge.

Educators: Review “Note to Educators” on page 14 before using this *Natural Inquirer* monograph.
